1. Claims 1-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is misdescriptive, and thus indefinite, to recite that the "feedback circuit" provide feedback paths between the first and second nodes (and also between the second and third nodes). For this to be the case, the circuits 160, 165, 170 and 175 would need to provide a direct (short-circuit) path between the recited nodes when the FETs therein are closed. However, such paths are not provided when the FETs are closed in the circuitry of Fig. 4 of the instant drawings.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Shin.

To the extent applicant's circuitry includes "feedback circuits" (note the indefiniteness rejection above), in Shin the

Art Unit: 2816

circuits 31, 33, 35 read on the recited first plurality of feedback circuits, and circuits 32, 34 and 36 read on the recited second plurality of feedback circuits, note Fig. 3 of the reference. The recited first through fourth transistors correspond to FETs MN1 through MP1, respectively; and the power supply and reference nodes are VDD and ground, respectively.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (703) 308-4809. The examiner can normally be reached on Monday through Friday from 7:30am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan, can be reached on (703) 308-4876. The fax phone number for this Group is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
